

Immediate indication

Specifications:

Product Code	400.0001
Power	+24V AC/DC 6W
LED	25 per colore
LED life	about 100.000 hours
IP Grade	IP 65
Output	1 green - 2 red - 3 GND
Lens	2 lens 120mm
Operating temperature	-30 / +80 C°
Dimensions	180 x 290 x 410 (L x W x H)
Weight	2.7 Kg

Signal

Signal traffic light, with LED technology, reduces energy consumption compared to traditional traffic lights, thanks to the use of LED that save operating and maintenance costs.

In fact, these lamps produce an intense and bright monochromatic light, as well as guaranteeing a significant duration of operation as they use the technology with independent lighting elements, which allows regular operation even in the event of a single element failure.

The two-light LED traffic light uses two 25 LED cards to display the red-green (RG) colors combination.

Signal lights are mainly used to manage priority movements in condominiums, residences, car parks, industrial environments, etc.

This traffic light allows it to be rotated by an angle of 200° approx. in steps of 3°.
