TOUCH FINGERPRINTING

2D MOVE

When on the go, the 2D MOVE is your best companion! This touch-based biometric tablet features real-time data synchronization with server over WiFi or 4G using your own SIM card.

- Portable terminal with capacitive touch sensor
- Excellent identification performance
- Logical Access Control, Time and Attendance (T&A)
- Real-time data synchronization with server
- Including RFID module for Mifare Classic or Desfire
- Identification or verification with PIN or card
- Including SIM card module and Wifi
- Small and medium-sized user groups
- Personalizable touchscreen
- User-friendly operation and configuration
- Customer-specific modifications
- Including power supply 5 VDC and USB charger cable
